

Welcome to the 31st Nordic Meteorological Meeting in Reykjavík, 18-20 June 2018!

The meeting is organized by the Icelandic Meteorological Society in cooperation with the University of Iceland and the Icelandic Meteorological Office. The website of the meeting is <http://vedur.org/index.php/nmm31>

NMM31 will feature sessions on various meteorological, climate and climate change related topics, with specially invited key note speakers.

Contributions on all aspects of meteorology and climatology are welcome, including:

- Development of numerical weather prediction models and Nordic operational cooperation
- Verification methods and comparisons of results
- Probability Forecasts
- Meteorological and climate information for the energy sector
- Communication of forecast and meteorological information
- Development of climate services for adaptation to climate change
- Remote sensing systems and new data sources
- Arctic: Observations of climate change and climate modelling

Registration is open at [nmm31-registration](#)

Abstracts of contributions should be submitted at the latest 1 April 2018.

The European Meteorological Society supports one young scientist to attend the meeting. Information on how to apply is on the website.

Note that it is wise to secure accommodation in Reykjavík as soon as possible!

Location: School of Education, University of Iceland, Stakkahlíð, 105 Reykjavík, Iceland
