Á morgun kl. 15

# Til frekari athugunar

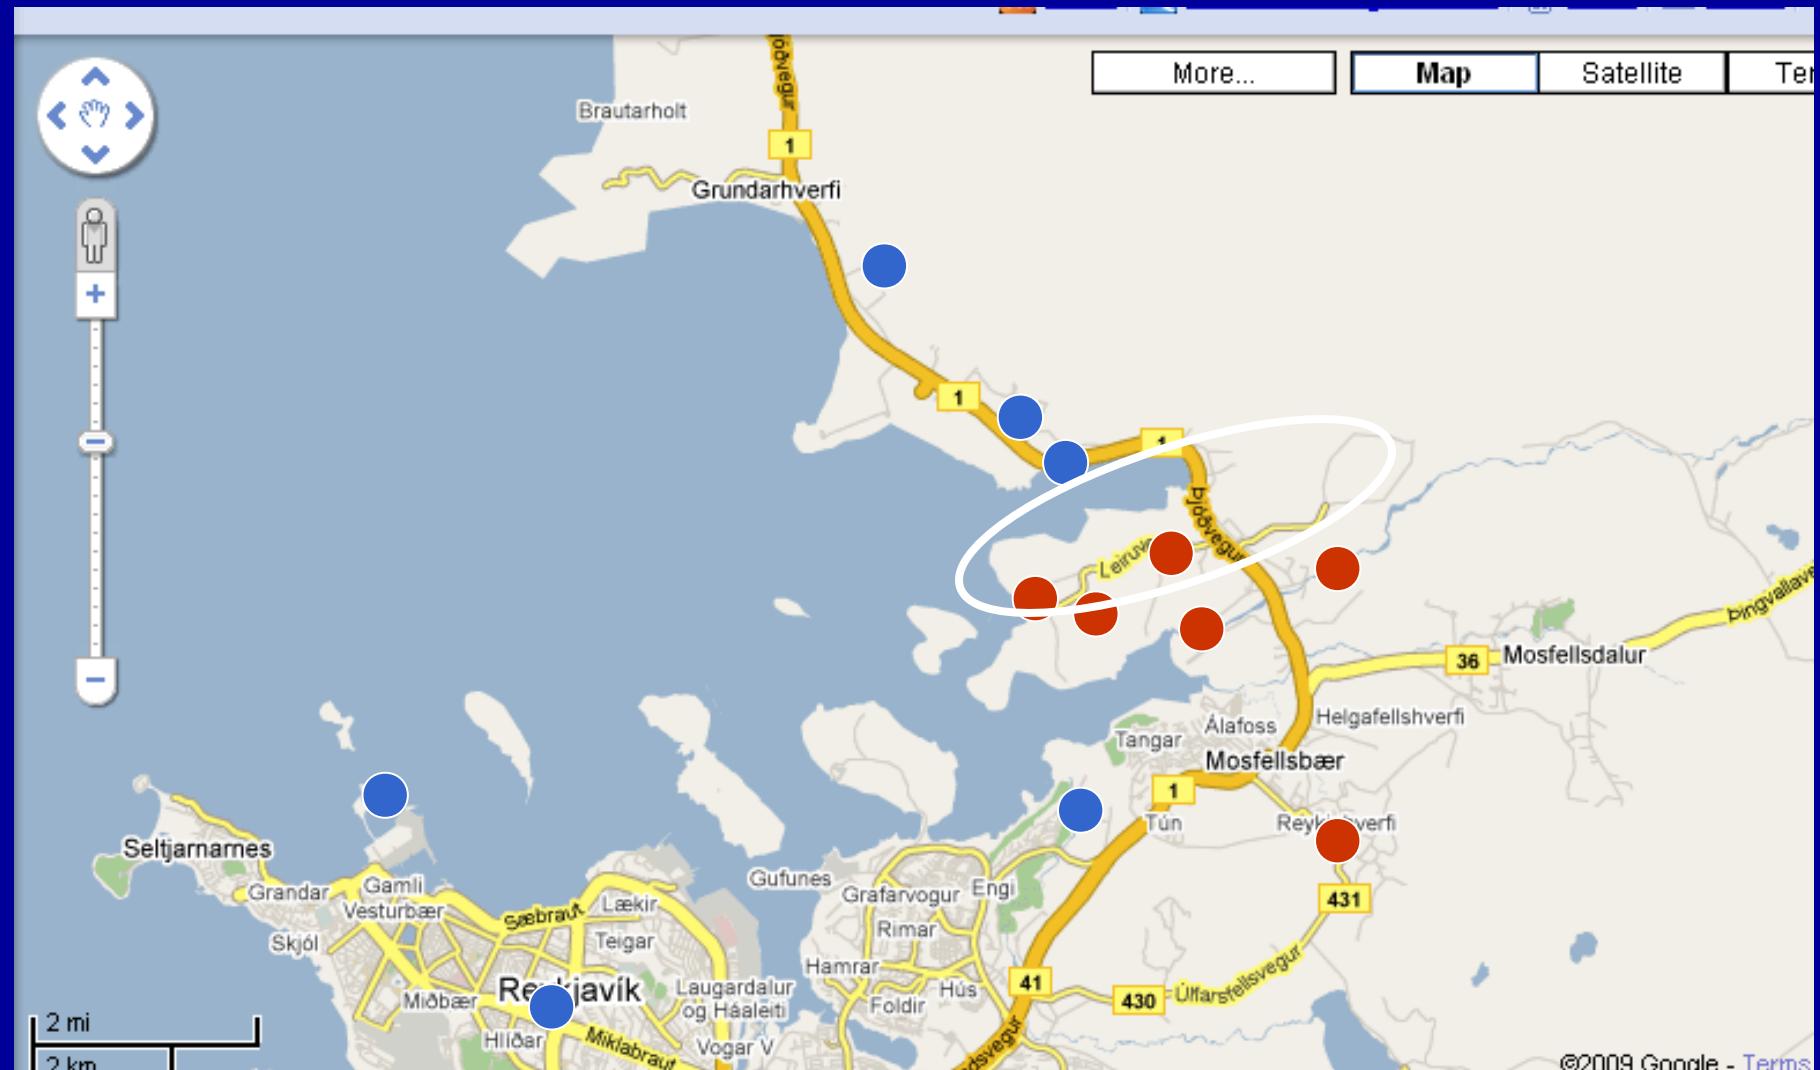

- Hvernig stjórnar hrýfi, loft- og sjávarhiti, hitafallandi og stórkvarða vindasvið hafgolunni?
- Mun hafgola breytast ef gróðufar breytist?
- Toga fjöllin í hafgoluna?

# Pólítisk niðurstaða

AWS

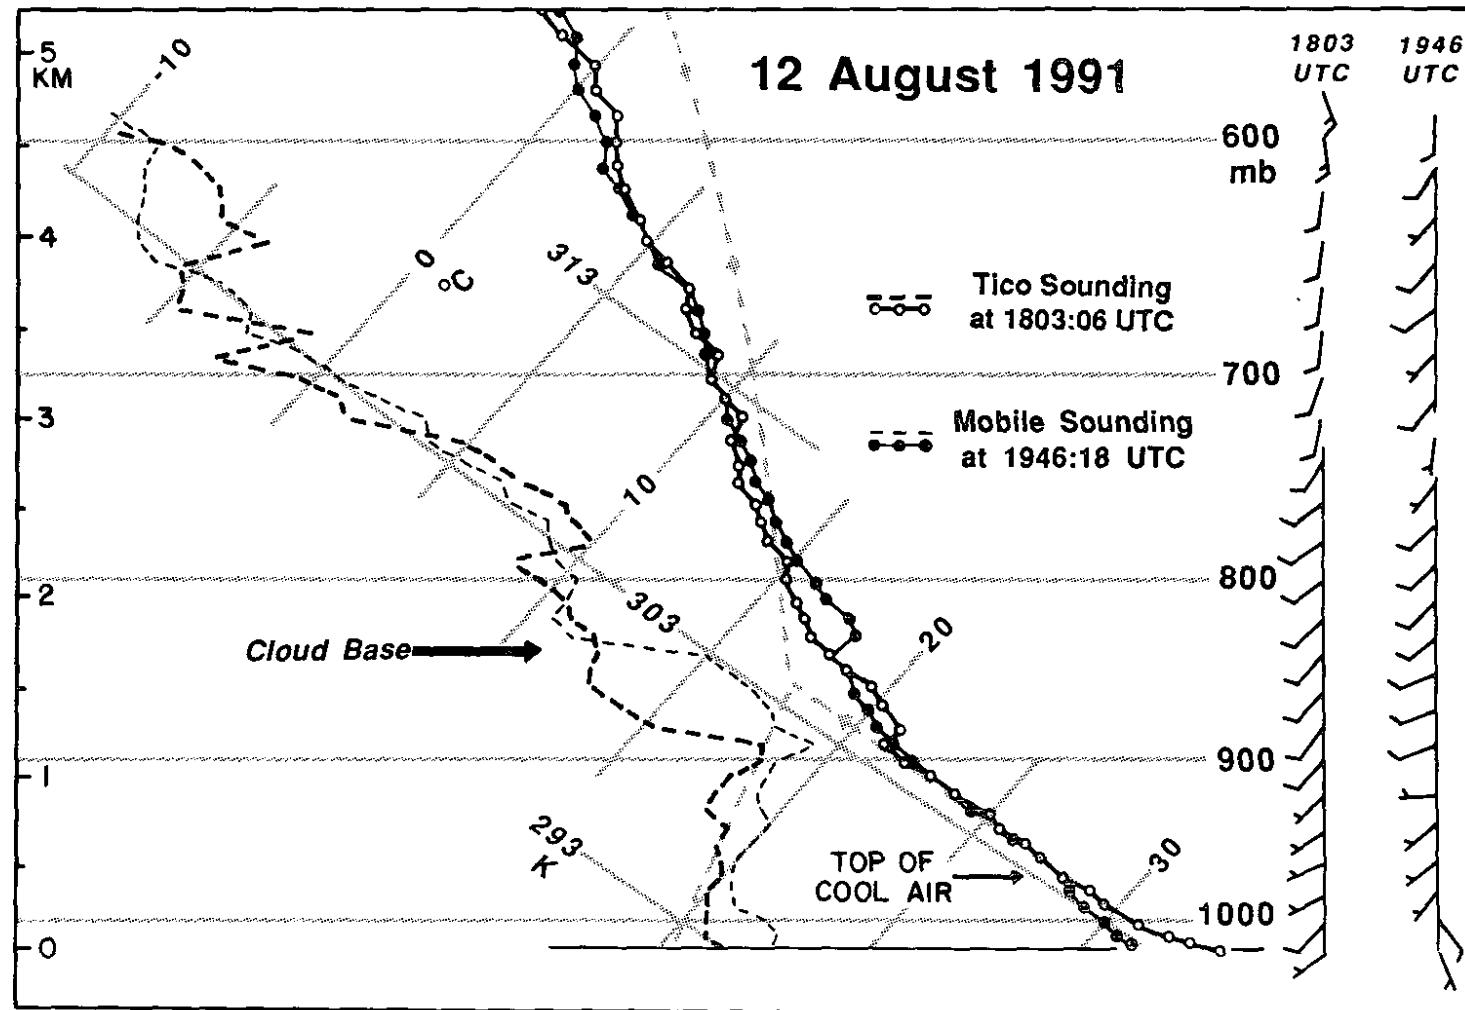

FIG. 7. Soundings launched at 1803:06 and 1946:18 UTC from Tico and a mobile sounding site on 12 August 1991, respectively. The locations of the former and latter sites are shown in Figs. 1 and 4, respectively. Top of the cold air and the photogrammetrically derived cloud base are indicated in the figure.
