A special issue of *Atmosphere* (ISSN 2073-4433). This special issue belongs to the section "Climatology and Meteorology".

Deadline for manuscript submissions: **15 September 2018**

atmosphere

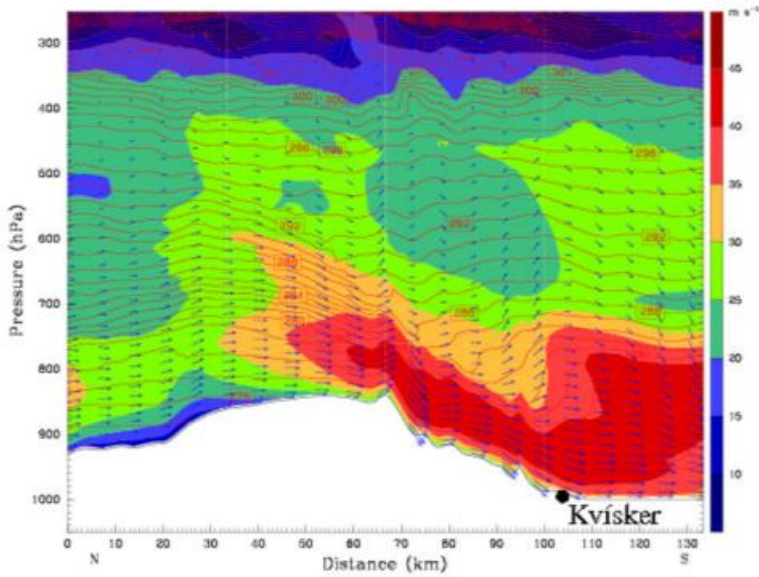

Some Concepts in Atmospheric Sciences

- Cyclone
- Front
- Trough
- Sea breeze
- Wave
- etc. etc

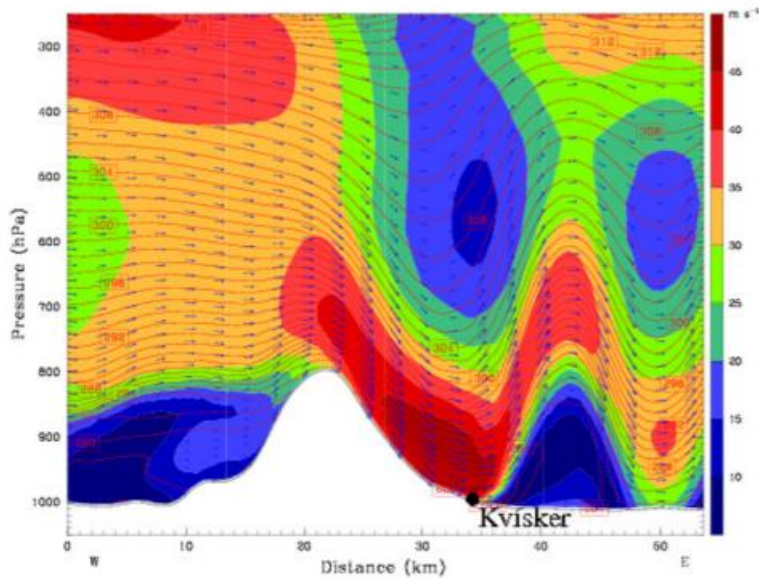

A few „new“ concepts introduced at the Bergen and Reykjavik schools

- Secondary gravity wave breaking
- Warm Bora
- Type E and S downslope windstorms
- Gustiness of rain
- The M-curve of orographic precipitation
- Quasi-geostrophic orographic flow
- The peninsula-effect on the sea breeze
- The Greenland heat pump
- The glacier rainband
- The orographic sea breeze pump
- The missing momentum flux
- The spring snow heating effect
- The Reykjavik Wake
- The two-step wake
- The Bergen Orographic Shelter
- QG forecast error tracking
- The traveling lee low
- The morning cooling
- The wind gust diagramme

**Type
E(xtended)
downslope
windstorm**

**Type S(hort)
downslope
windstorm**

The morning cooling (Reuder, Jonassen & Ólafsson, 2012)

Late night

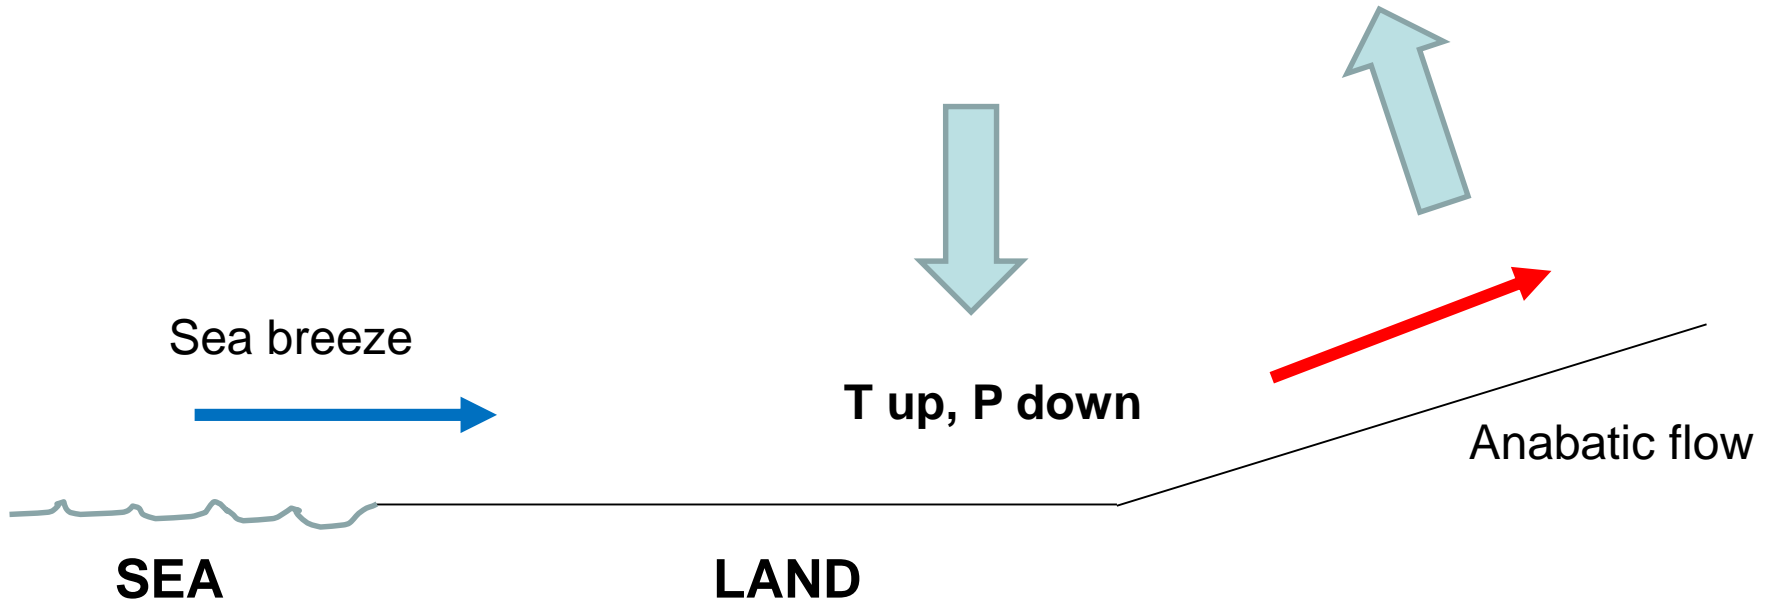

A short while after sunrise

Found during the BLLAST campaign in the Pyrenees

The orographic sea breeze pump

Ólafson & Ágústsson, 2008

The warming snow

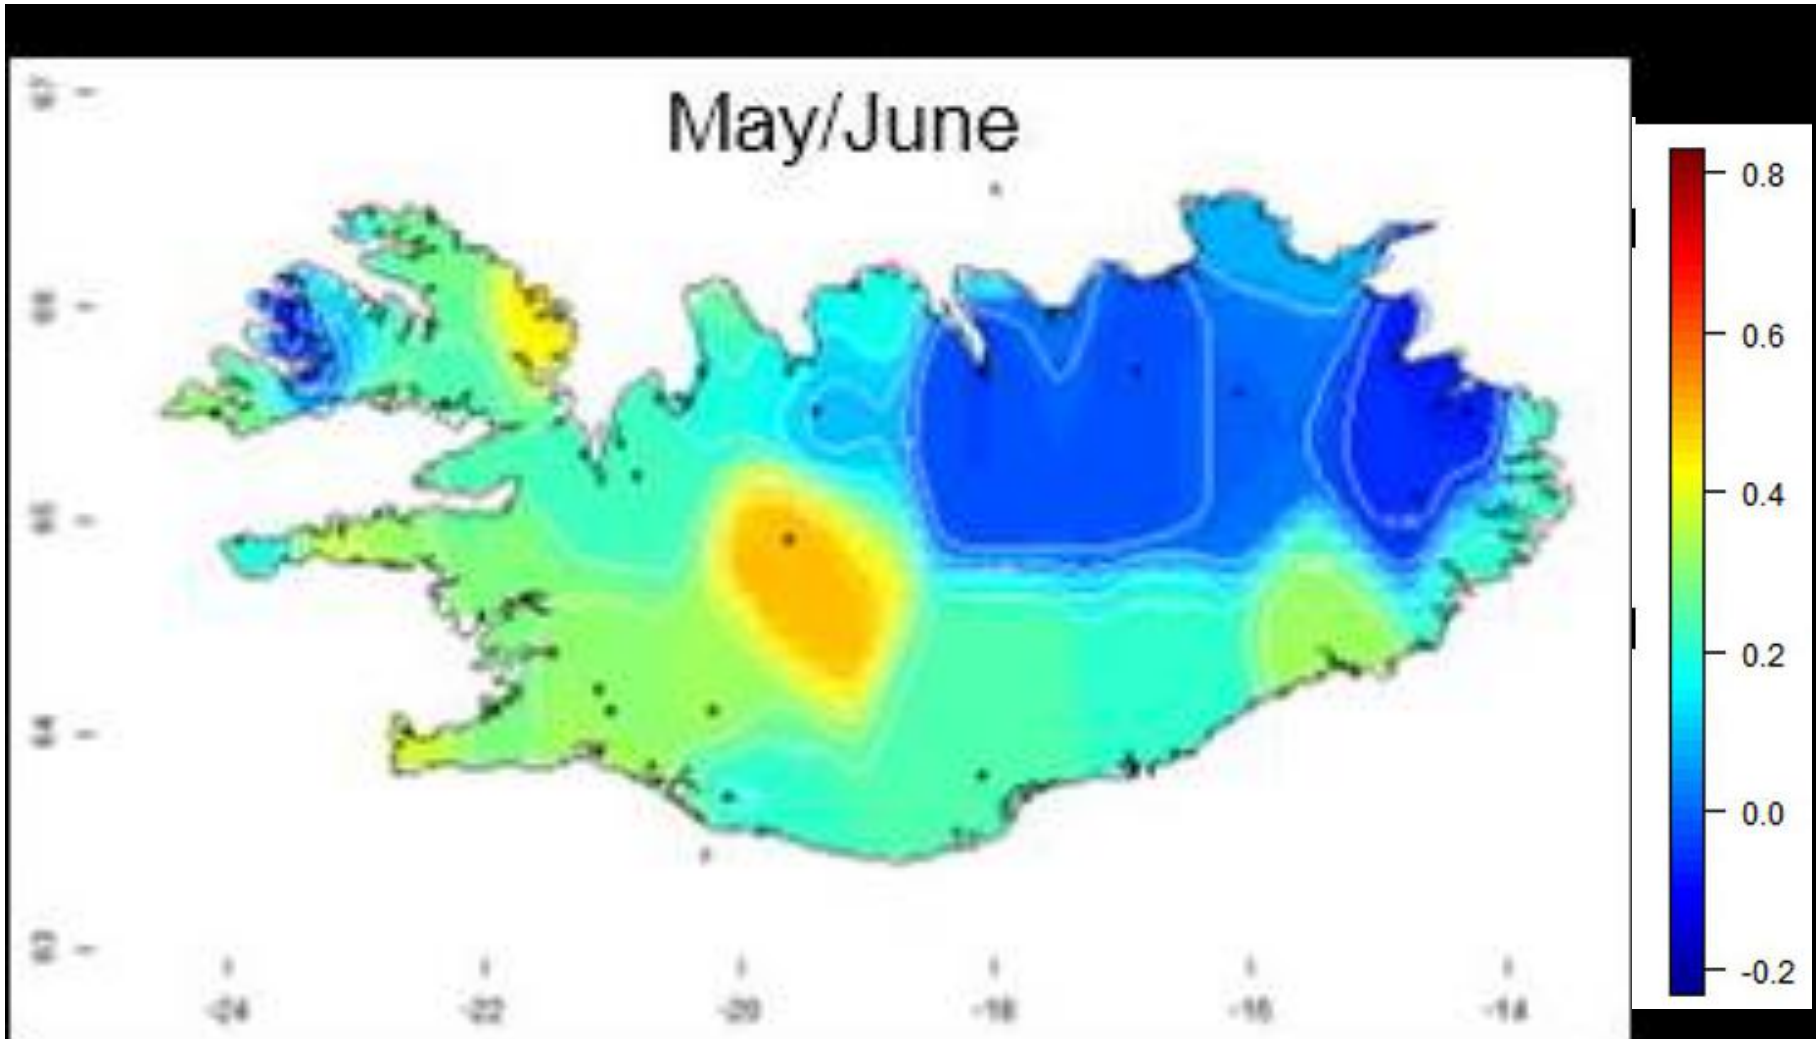

Strong and penetrating sea breeze

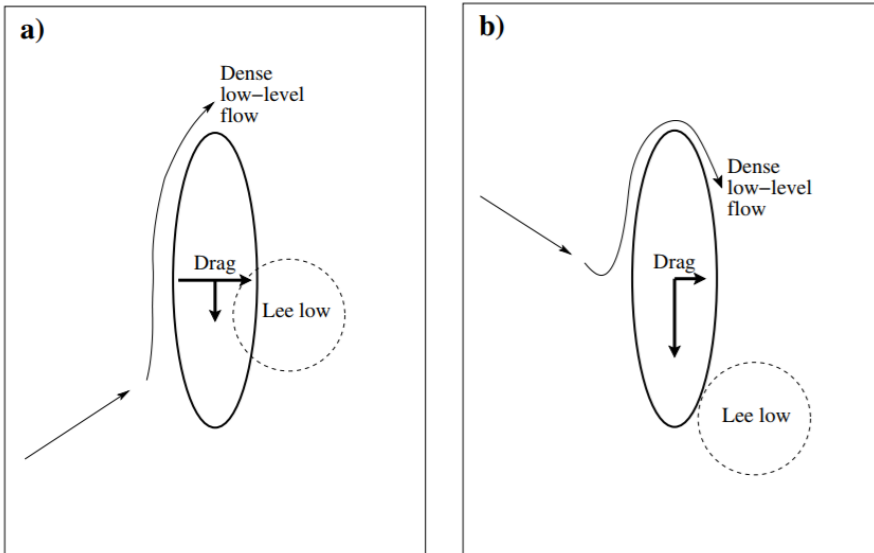

Weak sea breeze

Correlation between mean T2m in May and June

The taveling lee-low

Petersen, Krisjánsson, Ólafsson, 2005

G. N. PETERSEN *et al.*

A self-induced process that moves the lee-low to the right if you are facing the impinging flow

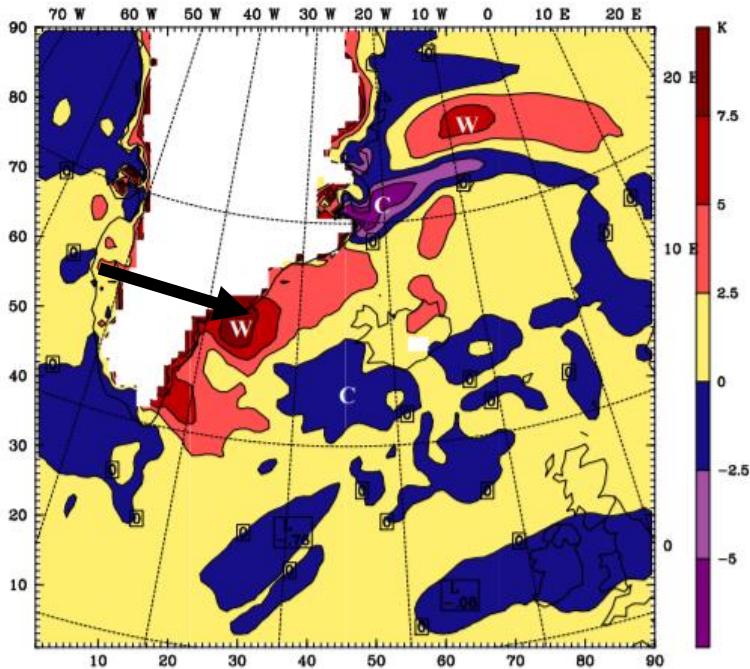

The Greenland Heat Pump

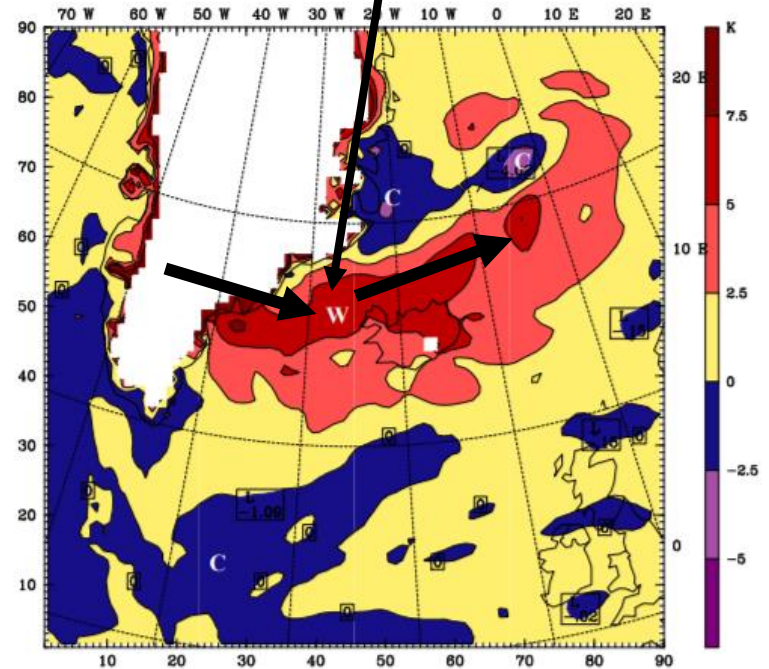

Rögnvaldsson & Ólafsson, 2003

T (850 hPa)
increased by more
than 5K (**Dark red**)

29/12 UTC (t_0+24h)

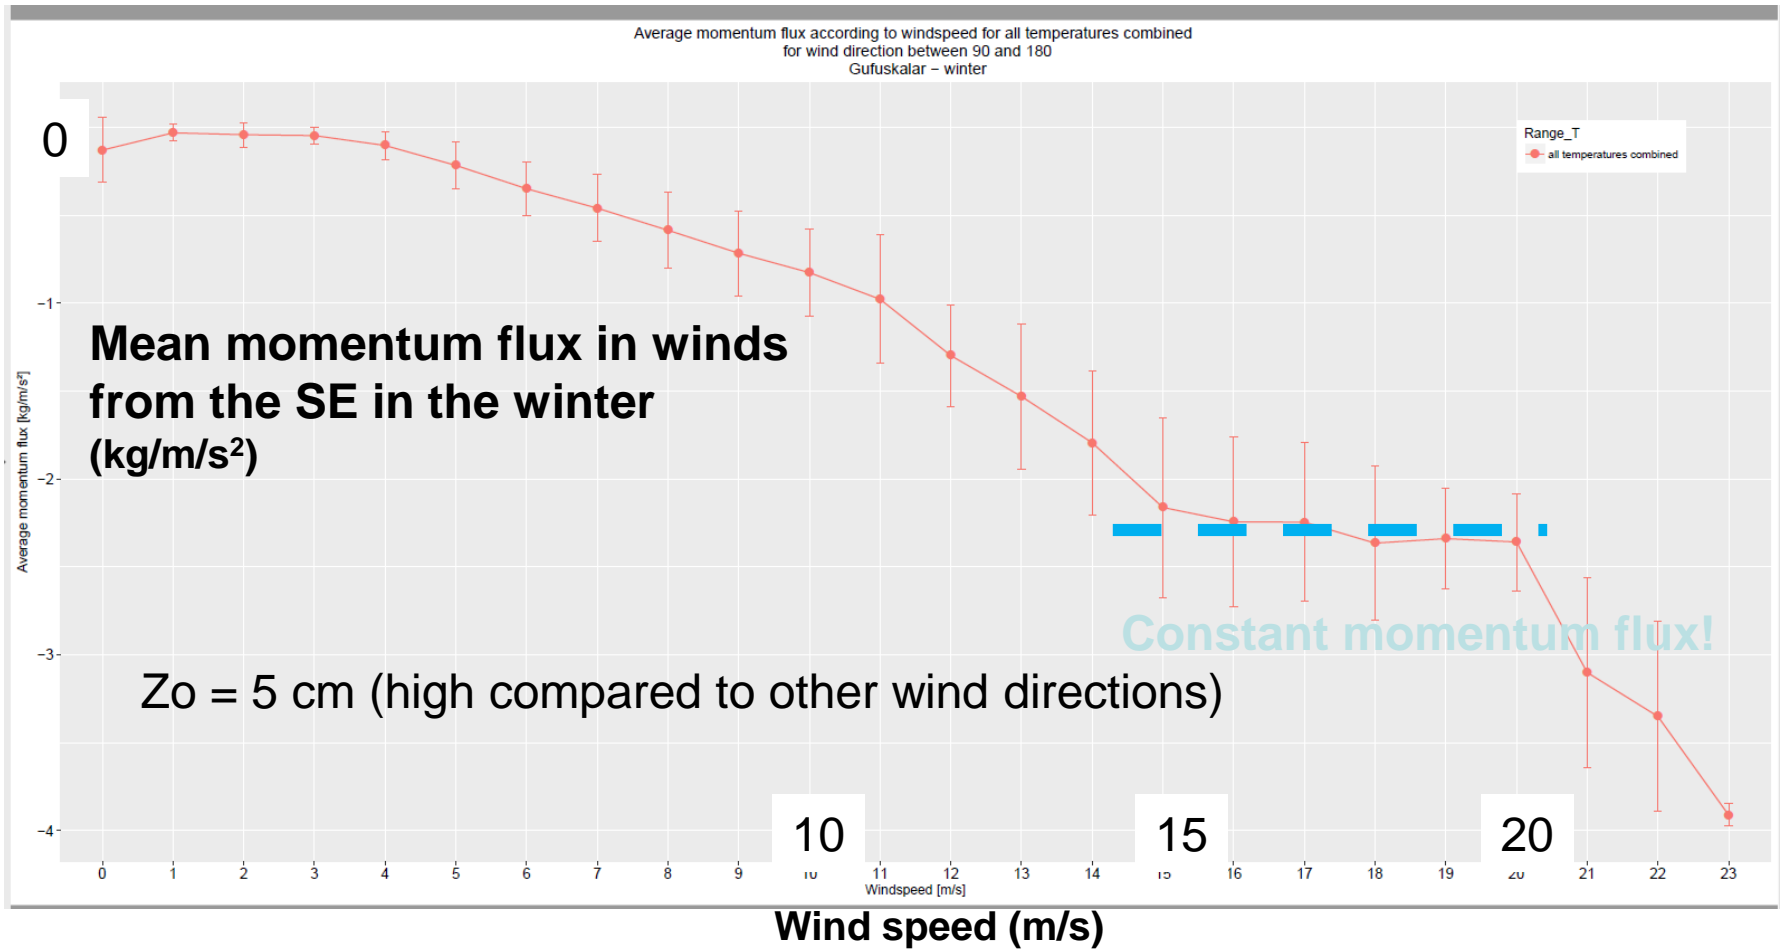

30/00 UTC (t_0+36h)

Quasi-geostrophic flow past mountains

The missing momentum

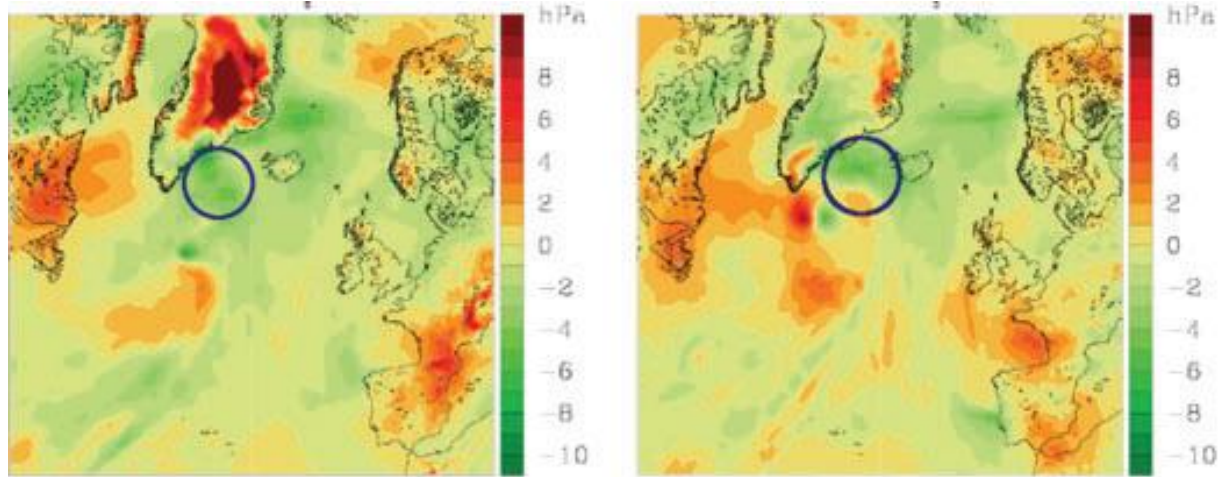

The Gust Factor Diagramme (Ágústsson & Ólafsson, 2004)

ECMWF 22.02.96 12UTC+36h. Valid 24/00

Arpège 22.02.96 12UTC+36h. Valid 24/00

Surface analysis for 24.02.96 00UTC (24/00)

Steensen, Ólafsson & Jonassen, 2011

QG error tracking

$$\left\{ \nabla^2 + \frac{f^2}{\sigma} \frac{\partial^2}{\partial p^2} \right\} \frac{\partial \Phi}{\partial t} = -f \mathbf{V}_s \cdot \nabla \left\{ \frac{1}{f} \nabla^2 \Phi + f \right\} + \frac{f^2}{\sigma} \frac{\partial}{\partial p} \left\{ -\mathbf{V}_s \cdot \nabla \frac{\partial \Phi}{\partial p} \right\} \quad (1)$$

Ólafsson, 1998

🗉 Thank you
